## **BIOENERGY LIFE SCIENCE PLANT GAINS A-LEVEL BRC CERTIFICATION**

*Superior Ribose Manufacturer Meets the Highest Global Standards*

**MINNEAPOLIS, MN (September 2012)** – Bioenergy Life Science, Inc., the only global manufacturer of pure and patented D-Ribose, recently gained a British Retail Consortium (BRC) accreditation with an A-level certification, which is the highest grade available, for its exclusive manufacturing facility in China operated by its parent Chengzhi Holding Co., Ltd.

“Receiving the highest level of accreditation from BRC confirms our company’s and our parent company’s commitment to providing the highest quality products to our ever growing customer base,” says Tom VonderBrink, President of Bioenergy Life Science, Inc. “Bioenergy Life Science is responsible for setting and implementing the quality standard at our manufacturing facility. This dedication to quality, resulting in the Grade A BRC accreditation, gives our customers security in knowing that the products produced in our facility are manufactured to the highest industry standards. This further validates our being the number one manufacturer and supplier of superior Bioenergy Ribose® in America and the world.”

The BRC Global Standards are a leading global product safety and quality certification program used by certificated suppliers in over 100 countries and is recognized as a GFSI (Global Food Safety Initiative) benchmarked food safety scheme. The BRC standard helps promote consistency across the supply chain – encompassing food, packaging, consumer products, storage, and distribution and covers critical topics such as HACCP system, factory environment, process control, quality management system, product control, and personnel.

Located in China, the manufacturing plant produces D-Ribose, through quality fermentation and reliable applied extraction and refinement techniques, making Bioenergy Ribose an advanced ingredient. The facility operates with the following certifications:

- ISO 22000
- Halal
- ISO 9001
- Kosher

### **What is Bioenergy Ribose®?**

Bioenergy Ribose® is the only patented brand of Ribose – a unique five carbon sugar that facilitates the natural process of energy production. Bioenergy Ribose® stimulates the synthesis of adenosine triphosphate (ATP), the essential energy compound found in every cell in the body, improving energy levels, fighting fatigue and boosting cardiovascular functioning. While the body naturally produces ribose, physical stress can deplete the body's natural stores, and the body's process for replenishing ribose is very slow in muscle and cardiac tissue. Using a supplement that contains Bioenergy Ribose® may help prevent the aches and soreness associated with depleted energy stores, allowing athletes and active individuals to train harder and longer.

Bioenergy Ribose® is GRAS (Generally Recognized as Safe) and is affirmed by the U.S. Food and Drug Administration by the issuance of a “no questions letter”.

### **About Bioenergy Life Science, Inc. ([www.bioenergyribose.com](http://www.bioenergyribose.com))**

Minneapolis-based Bioenergy Life Science, Inc. is the only provider of the pure and patented Bioenergy Ribose®. The company has amassed a large body of scientific literature on the uses of Ribose for people across all age and health categories. Bioenergy Ribose is used by millions worldwide in leading functional foods such as energy bars and beverages. Currently, Bioenergy Ribose is included as an ingredient in hundreds of products worldwide. The company's core technology lies in the development and commercialization of products based on the physiological benefits of Bioenergy Ribose for health and wellness.
