Caffeine won't fix our energy deficit

Bioenergy Life Science will be at RCA to show how products formulated with ribose can help to improve energy levels, fight fatigue and boost exercise recovery

Bioenergy Life Science will offer attendees at this year's Research Chefs Association's Annual Conference & Culinary Expo the opportunity to learn why there is so much industry excitement about ribose. In the wake of the caffeine/energy drink headline-making controversies, discover how energy-sustaining ribose is offering a more common sense, natural alternative.

Stop by Booth 405P during the RCA Culinary Expo, March 8 in Charlotte, NC, to sample a variety of products made with ribose, meet new Vice President of Sales Mark Johnson, and get many of your ribose formulation questions answered on the spot by Product Development Manager and expert food scientist Donna O'Connor. As manager of the Ribose Formulation Center, O'Connor is eager to discuss this ingredient's uses in formulations of functional foods, beverages, sports nutrition, dietary supplements and other nutritional products.

Explore energy-sustaining product formulations

Bioenergy Ribose is quickly gaining the attention of food manufacturers for its health benefits and unique energy functions. Bioenergy Ribose and its sweet taste, already popular in an array of beverages and supplements, can improve the nutritional profile and benefit claims of your food applications.

Products available for tasting at Booth #405P will include Fruit Snack Chews made with ribose and Dark Chocolate- and Greek Yogurt Cranberry Cinnamon-flavored protein ribose balls with whey crisps.

And be sure to stop by the networking coffee break on Friday March 8 from 9 a.m. to 9:30 a.m., where you will get to try the White and Chocolate Drizzle chewy granola bars made with ribose.
